

1.Create a comparison table the main differences between DDR3, DDR4, and DDR5 RAM, including speed, voltage, and typical use cases. Listing

Ans.

Features	DDR3	DDR4	DDR5
Year	2007	2014	2020
Speed	800-2133 MT/s	1600-3200 MT/s	4800-8800+ MT/s
Voltage	1.5 V	1.2 V	1.1 V
Capacity	Up to 16 GB	Up to 64 GB	128+ GB
Use case	Older office computer	Laptop & Gaming PCs	New gaming, video edit, and for high performance
Compatibility	Only in Motherboard	Only in Motherboard	Only in Motherboard

2.Open your laptop or desktop (with power disconnected), locate the RAM slots, and take a clear photo of the installed RAM module. Reinstall the RAM module and verify that your system boots up successfully. Refer to your device manual or a trusted YouTube guide if unsure about RAM removal and installation steps.

Ans.

Verification = The RAM module was removed and installed successfully. After the reconnecting the power, and the computer booted up normally without any errors.

3. List three key differences between HDD, SSD, and NVMe storage types, and for each, name one app or use case (from apps you use daily) that would benefit most from that storage type.

Ans.

Storage Type	Key Differences (Speed, Performance, Cost)	Daily App / Use Case	Why It Benefits
HDD (Hard Disk Drive)	Slow storage, use magnetic disc, low cost, and higher storage	Use for store photo and video	For storing large files and backups

SSD (Solid State Drive)	Faster than HDD, use flash memory, high cost, and better durability	Google	Open quickly and improves web browsing
NVMe SSD	Fastest storage, they connect with PCIe slot with very high read and write speed and very costly	Use for video editing	Provides fast loading, files transfer and smooth video editing

4.Remove the storage drive (HDD or SSD) from your system, take a photo of the connector type (SATA, M.2, or NVMe), and reinstall the drive. Confirm that your device recognizes the storage after reassembly. Constraint Only perform this task if you have access to a device you are allowed to open. If not, find and share a YouTube video link showing the process for your laptop/PC model.
