

1. On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

Ans.

2.Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation. If you don't have a spare USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.

Ans.

1. **Download Linux** – Download Ubuntu or Fedora ISO from its official website.
2. **Connect USB** – Insert a USB drive into your computer.
3. **Open Rufus** – Start the Rufus program.
4. **Select ISO** – Choose the Linux ISO file.
5. **Select USB** – Choose your USB drive in Rufus.
6. **Click Start** – Rufus will make the USB bootable.
7. **Wait** – Let the process finish.
8. **Ready to use** – Your USB is now ready to install Linux.

3.On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati. Find 'Language & Region' in System Preferences to add or change languages.

Ans. **Steps on macOS**

1. **Open System Preferences** – Click the **Apple menu** (□) and open **System Preferences**.
2. **Change wallpaper** – Click **Desktop & Screen Saver** and choose a new wallpaper.
3. **Open Language settings** – Go back to **System Preferences** and click **Language & Region**.
4. **Add a language** – Click the **+** (**Plus**) button.
5. **Choose Hindi or Gujarati** – Select **Hindi** or **Gujarati** from the list.
6. **Set the language** – Choose the selected language as the main language if you want.
7. **Restart if needed** – Some changes may need you to log out or restart.
8. **Check the changes** – Make sure the new wallpaper and language are showing correctly.

4. Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

Ans. Steps to Install Ubuntu and Create a User

1. **Install Ubuntu** – Install Ubuntu on your PC or in a virtual machine.
2. **Create a user** – During setup, create a new account with the username **gamer**.
3. **Finish installation** – Complete the Ubuntu installation and restart the computer.
4. **Open Settings** – Go to **Settings** → **System** → **Users**.
5. **Enable automatic login** – Select **gamer** and turn on **Automatic Login**.
6. **Restart Ubuntu** – Restart the computer or virtual machine.
7. **Check the login** – Ubuntu should automatically log in as **gamer**.
8. **Take a screenshot** – Take a screenshot showing **gamer** on the login screen.

5. Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

Ans. Guide to Install Windows 10

1. **Back up your files** – Save important photos, documents, and other files before starting.
2. **Create a Windows 10 USB** – Use an official Windows 10 ISO and make a bootable USB.
3. **Start the laptop from USB** – Insert the USB and restart the laptop. Open the **Boot Menu** and select the USB.
4. **Start installation** – Choose your **language, time, and keyboard**, then click **Install Now**.
5. **Choose the installation type** – Select **Custom: Install Windows only** for a fresh installation.
6. **Set up partitions** – Select the drive where Windows will be installed. **Do not delete or format partitions containing important files.** For a clean install, use the unallocated space and let Windows create the required system partitions.
7. **Install Windows** – Select the correct partition and click **Next**. Wait while Windows installs and restarts.
8. **Create your account** – Follow the setup steps to create a user account and password.
9. **Set privacy options** – Review settings such as **location, diagnostics, advertising ID, and activity history** and turn off options you do not want to share.
10. **Install updates** – Go to **Settings** → **Update & Security** → **Windows Update** and check for updates.
11. **Install drivers** – Check that Wi-Fi, sound, graphics, touchpad, and other hardware work correctly. Install missing drivers from the laptop manufacturer's official website.

12. **Install security software** – Make sure **Windows Security** is enabled and up to date.

Partitioning Tip

Keep your important personal files backed up before changing partitions. **Do not delete recovery or other partitions unless you know exactly what they contain.**

Steps That May Be Unclear

- The **Boot Menu key** is different on different laptops.
- Windows 10 setup screens can look slightly different depending on the version.
- Automatic driver installation may not work for every laptop.
