

1. Open your own laptop or desktop (or use an online PC hardware simulator if you don't have access to a real system) and identify the GPU model installed. Write down the GPU's brand, model number, and whether it is integrated or dedicated.

Ans.

Device	Processor	GPU Brand	GPU Model	GPU Type
Dell Inspiron 15 3000 Series	Intel Core i3	Intel	Intel UHD Graphics	Integrated

2. Take a clear photo or screenshot of the cooling system (fan, heatsink, or liquid cooling setup) inside your PC or from a PC hardware simulator. Label the main cooling components and briefly describe their function.

Ans.

- 1. Heatsink Base Plate** = A metal plate that takes heat away from hot parts to keep them cool.
- 2. Heat pipe** = A thin metal pipe that carry heat very fast from one place to another place.
- 3. Aluminium Fin Stack** = many aluminium plates put together to cooling things faster.
- 4. Cooling fan** = A small fan that blow the air to remove heat and to make the things cool.
- 5. Thermal paste** = It help the heat jump from hot part to cooler faster.

3. Create a comparison table listing at least 3 differences between air cooling and liquid cooling systems for GPUs, including factors like cost, efficiency, and maintenance.

Feature	Air Cooling	Liquid Cooling
Coast	Cheaper	More expensive
Cooling	For normal use and gaming	For heavy gaming and higher performance
Maintenance	Easy to maintain	Needs care and maintenance
Noise	Noisy when fan run fast	Silent
Installation	Easy to installed	Harder to install

4.Imagine you are building a gaming PC for streaming IPL matches and playing graphics-heavy games. Choose between air cooling and liquid cooling for your GPU, and justify your choice in 3-4 sentences based on your research.

Ans. I can choose the Liquid cooling for the gaming PC. It can keeps the GPU cool when I play the game for a long time. I can also watch the IPL matches without get the PC to hot. Liquid cooling is silent than the Air cooling, so they reduce the noise. It gives the better performance and they help the run PC smoothly. Although it was more expensive, it is the good choice for the gaming and streaming.
