

1.Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Ans.

Device	Type	Real life use
Printer	Inkjet printer	Print photo and assignments
Printer	Laser printer	They print office documents
Scanner	Flatbed scanner	They scan document and certificate
Scanner	Sheet-fed scanner	It can scan many pages quickly
Webcams	Built- in webcam	To attend the online class and meeting
Webcams	USB webcams	For video calls and meetings

2.Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

Ans.

In this picture show the different type of the connection that how the home printer connects to the laptop by the cable or wire less

In this have the three different connection

1. **USB**
2. **Wi-Fi**
3. **Bluetooth**

3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage. Think about speed, convenience, and compatibility.

Ans.

Connections	Used in	Advantage	Disadvantage
USB	Printer, Scanner, Webcams	This can have the fast and stable connection	Needs cable to connect and just near to the computer.
Wi-Fi	Printer, Scanner	It can be work without the cable and not connect from the distance	Can be slower when connection is slow
Bluetooth	Webcams, printers, keyboard	This can be easy to connect without cables and in a short distance	It can be slower than the USB and It can work on limited range

4. Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

Ans. **Steps to Connect a Printer to a Computer**

1. **Turn on the printer.**
2. Take a **USB cable** and connect it to the printer.
3. Connect the other end of the USB cable to the **computer**.
4. Wait for a few seconds so the computer can detect the printer.
5. If the computer asks for a **printer driver**, install it.
6. Go to **Settings → Printers & Scanners**.
7. Check if your printer is showing there.
8. Select the printer and make it the **default printer**.
9. Print a **test page** to check if it is working properly.

Result: The printer is now connected to the computer and ready to use.
